

iSectors® Capital Preservation Allocation

iSectors® Capital Preservation Allocation is a strategic model with the goal of offering stability of principal while providing a higher return potential than can be gained by cash or money market securities.

Portfolio Description

Recent market developments underscore the importance of following the evergreen principle of "being prepared." Prudent investment planning suggests constructing a portfolio that will meet your goals over a range of possible scenarios. The iSectors® Capital Preservation Allocation has been constructed for investors with a desire for principal stability over a 2-3 year period by creating a portfolio of investments with relatively low volatility. Nominal portfolio yield is a secondary goal of the model. The model targets fixed income exchange-traded funds (ETFs), primarily those that invest in short-term investment-grade debt instruments. A smaller portion of the assets may target ETFs holding short-term high-yield instruments, within the context of limiting duration to approximately 3 (or less) while maintaining an overall investment grade rating for the entire portfolio. Defined maturity ETFs are utilized to construct investment grade corporate, and short term high yield bond ladders within the portfolio as outlined below. While stability of principal is a primary goal of this portfolio, an investment in the iSectors® Capital Preservation Allocation is not guaranteed and will fluctuate in value.

About The Manager:

iSectors®, LLC manages a suite of exchange-traded fund (ETF)-based asset allocation models. Collectively, the iSectors web-based platform and series of asset allocation models offer advisors and their clients a broad selection of strategies, services and support to assist them in building and managing an appropriate investment solution designed to achieve a client's financial objectives.

Allocation models are categorized by risk and return characteristics and organized into three unique series of asset allocation approaches: Global Allocations (5 risk-based models), 2 Post-MPT Allocations and a Tactical Allocation model. Also offered are Capital Preservation, Domestic Equity, Endowment Allocation, Inflation Protection, Liquid Alternatives, and Precious Metals allocation models.

iSectors® ETF-based portfolios are low-cost (when compared to most actively-managed mutual funds), offer intraday liquidity, and provide transparency with respect to model holdings. All assets are held in separately or unified managed accounts titled in the client's name. Investors are fully supported by their independent registered investment advisor (RIA) and a team of back-office service professionals.
