Enhanced Allocation Models	The iSectors® Enhanced Allocation series blends a sophisticated short-term laddered bond strategy with a fundamental equity strategy. The Allocation is value-weighted with dividend paying, multi-national companies that have increased their dividends every year for many consecutive years. In addition, these strategies incorporate a 20% satellite allocation to iSectors® proprietary Post-MPT dynamic strategy. The Post-MPT portion of the Allocation brings downside protection not typically found in target risk portfolios. This dynamic satellite strategy reoptimizes its portfolio allocation each month based on an objective quantitative algorithm that considers monthly changes in 2 dozen economic and capital market factors. Each of these unique strategies has low correlation to the others providing each of the five target allocations with superior risk adjusted returns.
