The Objective of iSectors® Post-MPT Growth Allocation: To achieve market returns with lower downside risk (drawdown) over a complete market cycle.

Quarterly Performance and Attribution: iSectors® Post-MPT Growth Allocation gained 8.18% (net of fees) in the third quarter ended September 30, 2024. This outperformed the S&P 500 Index, which gained 5.89% during the quarter.

During the third quarter of 2024, gold bullion exposure contributed the most to gains in the portfolio, while basic materials, technology, and treasury bonds also provided positive returns. The model continues to maintain a diversified allocation, positioned for potential stagflation, among equities, alternatives, and fixed income. Gold bullion, technology, and treasury bonds hold near maximum weightings, while healthcare exposure has been removed from the portfolio entirely. The model also has modest exposure in basic materials and a small allocation to real estate.

iSectors® Post-MPT Growth Allocation's Investment Strategy: iSectors® Post-MPT catapults Modern Portfolio Theory (MPT) to a new level of effectiveness. The investment model's strategy uses the principles of MPT to develop and maintain an optimal (along the risk vs. return efficient frontier) portfolio allocation. The key principles contributing to iSectors® Post-MPT Growth Allocation's risk-adjusted performance success are:

- Allocation among nine low-correlated asset classes. This reduces risk versus using the higher correlated large, mid and small cap value, growth, and blended asset classes.
- A more robust mathematical algorithm allows the use of monthly changes in more than a dozen capital market and economic factors to create and maintain optimal asset allocation.
- The use of technology and index based exchange-traded funds allows iSectors to provide its investment models at a low cost.
- Post-MPT models consider drawdown (any return below zero) as the measure of risk. Standard deviation, the traditional measure of risk is inappropriate because it considers upside volatility as bad as downside volatility.

Portfolios may be invested up to a maximum of 30% into any one asset class. However, up to 50% of the allocation may be invested in government bonds. iSectors investment models are available for all types of accounts including: high net worth individuals, trusts, foundations, endowments, retirement plans, and IRAs. Prices, holdings, performance, and tax information are updated daily and can be viewed online. In addition, all iSectors investments provide investors daily liquidity.

Performance results assume \$100,000 account and are presented net of fees of 0.50% and reflect inception-to-date period (2/1/2005 - 9/30/2024).

iSectors[®] Post-MPT Growth Allocation -- 4 Year Rolling Periods

Timing an investment in iSectors[®] Post-MPT Growth Allocation should not be a concern. The graph above compares an investment in iSectors[®] Post-MPT Growth Allocation to an investment in the S&P 500 Index. The comparison looks at 189 rolling 4-year periods over 19 years from 2/1/2005 to 9/30/2024. As long as an investment in iSectors[®] Post-MPT Growth Allocation was held for 4 years, there was only a 2.12% chance of losing money. On the other hand, an investment in the S&P 500 Index held for 4 years would have lost money 17.46% of the time.

iSectors[®] Post-MPT Growth Allocation vs. S&P 500
Inception (2/1/2005) through 9/30/2024

This graph compares an investment in iSectors[®] Post-MPT Growth Allocation to an investment in the S&P 500 Index. The comparison considers returns on rolling 12-month periods for both investments from 2/1/2005 to 9/30/2024. In any 12-month period that the S&P 500 was negative, the iSectors[®] Post-MPT Growth Allocation outperformed it during that period 77% of the time and only captured 52% of the loss. In any 12-month period that the S&P 500 was positive, but with a gain of less than 10%, iSectors[®] Post-MPT Growth Allocation outperformed it 62% of the time, while capturing 159% of the gain. In addition, when the S&P 500 gained over 10% in a 12-month period, iSectors[®] Post-MPT Growth Allocation still managed to capture 58% of the gain.

Important Disclosure Information

iSectors® is a suite of proprietary asset allocation models and services. iSectors®, LLC is an affiliate of Sumnicht & Associates, LLC (Sumnicht) and, as such, iSectors® and Sumnicht share certain employee services. iSectors® became registered as an investment advisor in August 2008. iSectors® is a registered trademark of Sumnicht Holdings, LLC.

The contents of this presentation are for informational purposes only. Content should not be construed as financial or investment advice on any subject matter. This is neither an offer nor a solicitation to buy and/or sell securities. Information pertaining to iSectors® operations, services, and fees is set forth in its current disclosure statement (Form ADV, Part 2 Brochure), a copy of which is available upon request.

iSectors® asset allocation models are not guaranteed and involve risk of loss. At any given point in time, the value of iSectors® asset allocation model portfolios may be worth more or less than the amount invested. Different types of investments and/or investment strategies involve varying levels of risk, and there can be no assurance that any specific investment or investment strategy (including the investments and/or investment strategies devised or undertaken by iSectors®) will be either suitable or profitable. Financial professionals are responsible for evaluating investments risks independently and for exercising independent judgement in determining whether investments are appropriate for their clients.

Past performance may not be indicative of future results. Therefore, no current or prospective investor should assume that future performance will be profitable, or equal either the performance results reflected or any corresponding historical index. Asset allocation and diversification concepts do not ensure a profit nor protect against loss in a declining market.

The historical benchmark index performance results are provided exclusively for comparison purposes to assist an advisor in determining whether the performance of a specific investment meets their respective client's investment objective(s). It should not be assumed that any account holdings will correspond directly to any comparative index. Index performance results do not reflect the impact of taxes. Indexes are not available for direct investment. Index performance results are compiled directly by each respective index and obtained by iSectors® from reliable sources. Index performance has not been independently verified by iSectors®. iSectors® models are based primarily on index ETFs that can neither outperform nor underperform their benchmark index. We provide benchmark indexes that are well known for comparison purposes only.

Net Performance results reflect the deduction of the iSectors® Strategist Fee. Actual client results will be lower based on fees for platform, advisory, transaction, and custodial services that are not set at (and may not be known at) the iSectors® level. Additionally, if your account (through your adviser or otherwise) does not fully follow a specific iSectors® model, performance would also, of course, further differ. Please consult your financial adviser for fees applicable to your account. ERISA (group retirement) accounts are subject to additional recordkeeping and/or administrative fees.

Sumnicht & Associates / iSectors® (the "Firm") claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute.
