

iSectors® Global Equity Allocation

Portfolio Description

The objective of the iSectors® Global Equity Allocation model is to provide long-term growth of capital. This equity-only portfolio is allocated among a diversified selection of domestic and international low-cost equity index-based exchange-traded funds (ETFs). In addition, fundamentally-weighted, dividend-focused index ETFs are used in an effort to enhance return and reduce volatility. Two percent of the portfolio is allocated to cash and/or money market securities to provide liquidity and facilitate transactions. This portfolio is intended for investors with an aggressive risk utility and a long-term time horizon.
