

iSectors® Global Fixed Income Allocation

Portfolio Description

The iSectors® Global Fixed Income Allocation model seeks to provide investors with current income through a portfolio of U.S. and non-U.S. fixed income securities. The core of the portfolio holds domestic and international government, investment grade corporate, and mortgage-backed bonds with various maturities. The remainder of the portfolio is invested in exchange-traded funds (ETFs) that hold non-investment grade fixed income securities and high-yield bonds in an effort to add diversification and the potential for increased returns. Two percent of the portfolio is invested in cash and/or cash equivalents to provide liquidity and facilitate transactions. This model is intended for investors with a conservative risk utility and shorter-term time horizons.
